

SUSHEN GROVER

+91 7009367016 Portfolio groversushen@gmail.com LinkedIn GitHub

Education

Vellore Institute of Technology, Chennai

Aug 2023 – Present

B.Tech in Computer Science and Engineering (CGPA: 9.16)

Experience

Summer Research Intern Program, VIT University

May 2026 – June 2026

Research Intern

Remote

- Implemented HybridRAG pipeline using FAISS, Neo4j, LangChain, and Llama models with advanced retrieval techniques like query decomposition, HyDE, RAG Fusion, and cross-encoder reranking.
- Evaluated system performance using the RAGAS framework across Faithfulness, Answer Relevancy, Context Precision, and Context Recall metrics.

BluMotiv

Jan 2026 – Apr 2026

Software Development Intern

Remote

- Built backend services and data pipelines for fleet management systems used in electrified industrial vehicles.
- Integrated ML model outputs with real-time telemetry and digital twin data through REST APIs.
- Worked on cloud-native architectures, scalable ingestion workflows, and production-grade backend services.

Technical Skills

Languages: C++, Python, Java, C, SQL

Frontend: HTML, CSS, JavaScript, React, Tailwind CSS, TypeScript

Backend & APIs: Node.js, Express.js, Flask, FastAPI, REST APIs, WebSockets

Databases: MySQL, DynamoDB, BigQuery, SQLAlchemy, Cassandra, Redis, Postgres, MongoDB

Cloud & Systems: AWS (Lambda, API Gateway, S3, Cognito, SNS, SQS, EC2), GCP, Linux, GitHub

Applied AI: RAG Pipelines, LLM APIs, Prompt Engineering

Projects

Healytics (Full-Stack) (ML)

GitHub

- Built a full-stack chronic care risk prediction system using React frontend and Flask-based REST APIs.
- Implemented an XGBoost-based prediction engine to estimate 90-day patient deterioration risk from clinical data.

Vaahan (AWS)

GitHub

- Developed a fully serverless vehicle rental platform using AWS Lambda, API Gateway, DynamoDB, and Cognito.
- Ensured data consistency using DynamoDB conditional writes and SNS-based notification triggers.

P2P Vault (WebRTC)

GitHub

- Built a real-time peer-to-peer chat and file sharing system using WebRTC and Socket.IO.
- Implemented AES-256 end-to-end encryption with zero server-side file persistence.

Achievements

IDFC First Bank (Incoming Application Engineer)

- Selected as 1 of only 2 students campus-wide for the Application Engineer (Intern + FTE) role at IDFC FIRST Bank, following a multi-tier technical evaluation and CTO round.

Competitive Programming (LeetCode)

Profile

- Solved 600+ problems, including 400+ medium and hard-level problems and complete SQL 50 List.

Certifications

AWS Certified Solutions Architect – Associate

- Demonstrated knowledge of designing scalable, secure, resilient, and cost-effective architectures on AWS.
- Covered core AWS services including EC2, S3, VPC, RDS, IAM, Lambda, and load balancing.

Generative AI Using IBM Watsonx Certificate

Certificate

- Hands-on experience with transformer models, RAG pipelines, prompt engineering, and AI-powered applications.
- Built real-world applications using IBM Watsonx and Google FLAN-T5.

Google Data Analytics Professional Certificate

Certificate

- Gained strong foundations in data cleaning, SQL querying, and data-driven decision making.
- Worked with BigQuery, Tableau, R, and spreadsheets for structured analysis.
